SUMMARY

Computer Science student and technical co-founder with experience in software automation, cloud systems, CI/CD, and full-stack development, seeking 2026–27 software engineering, backend, and cloud infrastructure internships.

EDUCATION

B.S. Computer Science

Dec 2027

Arizona State University, Online

3.85 GPA

Relevant Coursework: Data Structures & Algorithms, Intro to Software Engineering, Distributed Software Development, Database Management, Operating Systems (in progress), Intro Artificial Intelligence (in progress)

TECHNICAL SKILLS

Programming: Java, Python, C/C++, C#, SQL, JavaScript, TypeScript, Bash

Cloud, Backend, and Databases: Azure, Azure DevOps, CI/CD, GitHub Actions, Cloudflare Workers, Microsoft SQL Server, Oracle SQL Developer, SSRS, H2

Tools, Web, and OS: Git, GitHub, JUnit, Maven, HTML, CSS, Astro, Tailwind CSS, macOS, Linux/Unix

PROFESSIONAL EXPERIENCE

HANDS (SproutForge3D LLC), Phoenix, AZ: Co-Founder & Engineering Lead

Aug 2025 – Present

- Co-founded a STEM education startup developing hands-on learning kits that integrate 3D-printed hardware for K–12 classrooms, with curriculum piloted in 8 Phoenix-area classrooms.
- Secured \$6,000 in seed funding at ASU’s Venture Devils Demo Day, supporting educator-driven customer discovery and engagement with statewide education partners, including ASTA.

Shamrock Foods Company, Phoenix, AZ: Systems Analyst Intern

May 2026 – Jul 2026

- Developed document-batching software within an Agile Scrum team using SSRS, Azure DevOps, and Azure CI/CD, supporting the replacement of legacy on-premise services with an automated, timer-triggered system.
- Implemented a Microsoft Copilot agent that streamlined QA audit workflows, improved audit efficiency by more than 80%, and increased company wide employee access to policies and procedures.

Vestas Blades America, Weld County, CO: Production Associate Intern

Jun 2024 – Aug 2024

- Identified and communicated manufacturing process inefficiencies and quality risks during turbine component production, collaborating with engineering and QA teams.
- Recognized for quality, efficiency, and initiative; invited to pursue an engineering pathway based on performance and contributions that led to a 5% improvement in build quality and reduced rework.

PROJECTS

sQaaS: User Story Application (JavaFX Application), Class Project

Fall 2025

- Developed a full-stack, SQL-backed JavaFX application supporting user stories, support tickets, OTP account recovery, direct messaging, and threaded Q&A across multiple user roles.
- Collaborated over five months using Git-based workflows, CI/CD pipelines, automated testing, and iterative delivery to deploy a scalable role-based system with secure access and persistent data management.

HANDS Website, Personal Project

Fall 2025

- Built a modular front-end website to establish HANDS’ online presence and support early-stage customer discovery and outreach.
- Generated 20,000+ unique visitors in the first month, resulting in more than 10 direct inquiries and increased social platform engagement.

Small-c Compiler, Class Project

Spring 2025

- Built a Small-C compiler front end in C using Flex and Bison, with a scanner, a parser for functions, expressions, and control flow, line-numbered error reporting, and a Makefile build.
